

FOLDING STAND

*Sandbag not included.

PRODUCT OVERVIEW

McCain Walls® folding stands are quick and easy to assemble, install, break apart, and store.

When assembled, the folding stands form a triangular support mount configured by a folding bracket, a sandbag mount, clevis pins, and screws.

The lightweight, folding stand are ideal for free-standing McCain Walls systems.

- ★ Quick and easy assembly, installation, and storage
- ★ Pre-drilled holes align with existing holes on the modular wall panel
- ★ Commercial-grade, all-steel construction supports heavy sandbags

PRODUCT	PART NO.	COLOR	MATERIAL	DIMENSIONS	WEIGHT
Standard Folding Stand	MW-STL-Stand	Yellow	Steel	88"H x 48"D x 31"W (plate)	32 lbs.

*Dimensions rounded up to the nearest inch.

SOME ASSEMBLY REQUIRED

To assemble, unfold the folding stand bracket (Fig. 01) into a triangle and lock into place with the quick release pin. Stand it up and place the sandbag plate (Fig. 02) on the center bar, find the best position for your project, and secure in place using the clevis pin. To finish, secure the 90° side (Fig. 03) to the McCain Walls system using screws, and finally place the sandbags onto the sandbag plate.
