

McCain Walls® Standard Wall System Components

McCain Walls modular temporary wall system components are interchangeable and can be reconfigured to meet most job specs. Its robust design is manufactured from 0.09 THK 5052 aluminum, and the vertical, interlocking panels can be modified to less than 10'. Heights up to 14' can be achieved with enhancer panels (see optional components list). All McCain Walls system components are available in white powder coat gloss finish.
