

Reusable Modular In-Plant Solutions

We help customers grow with their business.

ABOUT US

McCain Walls® robust modular systems are designed to facilitate the expansion of your facilities and maximize the use of your space without the disruption and high-cost of new construction.

Our walls are ideal for biotech manufacturing, industrial warehouses, breweries, commercial spaces, indoor grow rooms and more.

They easily reconfigure to meet your needs.

REUSABLE MODULAR SOLUTIONS

Storage Rooms & Enclosures

Our modular enclosures are versatile and can accommodate your storage and modular room needs. *McCain Walls* in-plant rooms can be used to store valuable equipment or create private or working rooms- clean, quality, noise, and dust containment areas.

One- & Two-Sided Walls

Our one- and two-sided *McCain Walls* provide quick and easy room divisions, partitions, and temporary, or permanent walls. Interior walls are available in various colors and finishes.

Modular in-Plant Office

Enhance operations and maximize your facility's space with *McCain Walls* Modular Offices. Gain unlimited flexibility with cost-effective modular solutions designed to ease expansion, provide workspace without the disruption or high-cost of traditional construction.

THE BENEFITS ARE ENDLESS

- All of our *McCain Walls* modular products are quick and easy to install, saving time, money and labor.

The flexible design requires minimal tools and labor to install and can be done so at a fraction of the time it takes to build traditional drywall applications.

The prefab powder-coat walls provide a graphics-ready finish ideal for branding and advertising opportunities.

The McCain Walls system was delivered on time, reduced our construction overall schedule, and installation was easy quick, and clean. Our owners and customers were very impressed and we have reused McCain Walls several times already, making it very cost effective as well.
